1. In order to save money on handling costs (resorting), farmers must ensure that their wool is well classed and properly pressed.
2. Ensure that all the equipment needed in a shearing shed is in place and that the shearing shed is disinfected.
3. Make sure that there are no foreign or loose objects lying around to avoid contamination of wool.
4. Take note of the maximum weight of 180kg for a bale and the minimum of 120kg. Lox can weigh up to 250kg.
